

**Case Study Category:** MPWW

**Case Study Title:** Management Practice Case Study for CSO Manual Development

**Utility Name:** Metropolitan Water Reclamation District of Greater Chicago

**Case Study Abstract:** This case study for the City of Chicago covers a very basic outline of their plans for sewer interceptor renewal. While other components of infrastructure management (manholes, pump stations, treatment plants, etc.) are included in the original CSO Manual, the only documented practices included in the case study are those involving the actual pipelines.
