

**Case Study Category:** MPWW

**Case Study Title:** Components of Successful Capacity, Management, Operation & Maintenance (CMOM) Plan

**Utility Name:** Upper Occoquan Service Authority

**Case Study Abstract:** This case study reviews the content of the Upper Occoquan Service Authority (UOSA) Capacity, Management, Operation and Maintenance Plan (CMOM) as it relates to the interceptor sewers and force mains within the system. The components of the operation and maintenance plans are discussed as well as how these procedures play an active role in reducing the risk of recurring or new sanitary sewer overflows (SSOs).
