Case Study Title: CIPP Sewer Pipe Renewal for Villa Park, Illinois

Utility Name: Village of Villa Park Public Works Department

Case Study Abstract: This case study outlines the Village of Villa Park, Illinois project to renew a portion of its sanitary sewer system using Cured-in-place Pipe and directional drilling methods, as part of their capital improvement plan to reduce inflow and infiltration. A background of the Villa Park's utility will be given, followed by a description of the project and the technologies used therein. Finally a view of the outcomes of the project will be given.
