

**Case Study Category:** COSTDW

**Case Study Title:** Cost Case Study (Cambridge, MA; Leak Detection): Leak Correlation Survey for the Water Distribution System Water Mains

**Utility Name:** Cambridge, MA

**Case Study Abstract:** The City of Cambridge Water Departments seeks bids from qualified leak detection consultants to perform a comprehensive “leak correlation survey” on all of the City’s water mains including those private water mains owned by both Harvard University and MIT. Presently the City of Cambridge has approximately 185 miles of public water main. This includes private water mains on both Harvard University and MIT property. The leak detection survey must be completed within (90) ninety calendar days from the start of the survey.
