Case Study Title: Cost Case Study (King County, WA; pipebursting): Basin Ronald 002
I/I Removal Pilot Project

Utility Name: King County, WA

Case Study Abstract: The project's objective was to determine the effectiveness of replacing side sewers as a means to reduce I/I. The project area included approximately 290 single family residential properties in a sanitary sewer basin in the southwestern portion of Ronald Wastewater District (herein referred to as RWD or District). 208 of the laterals were pipeburst.
