

Case Study Category: CostWW

Case Study Title: Cost Case Study (Indianapolis, IN; Shotcrete): 2007 Large Diameter Sewer Rehabilitation

Utility Name: Indianapolis, IN

Case Study Abstract: Large Diameter (77" to 108") sewer rehabilitation by shotcrete. Many of the line item prices are by line segment so total footage is not immediately discernible. Over 4000 lf are designated by diameter and linear footage, but this only represents less than half of the financial scope of the project.
