

Case Study Category: CAWW

Case Study Title: Howard County Department of Public Works, Maryland Procedures Manual: Sewer System Evaluation Survey Phase II

Utility Name: Howard County

Case Study Abstract: This case study covers the contents of the Howard County Public Works Procedures Manual for the second phase of the utility's sewer system evaluation survey. Phase II of flow metering, field inspection (including above ground inspection, night-time flow isolation, smoke testing, sewer cleaning, Closed Circuit Television (CCTV) inspection, dye testing, and manhole inspection), and results of the SSES and field investigations are covered.
