Case Study Title: Water Pipe Case Study for Seattle Public Utilities, Washington

Utility Name: Seattle Public Utilities

Case Study Abstract: The Seattle Public Utilities (SPU) is a private utility located in Seattle, Washington. This utility serves a population of 1.3 million people (600,000 direct service retail; 700,000 wholesale) and manages water as well as wastewater. Based on the water revenue requirement, the SPU has a total operating budget of \$214 million. The miles of water pipe controlled and operated by SPU based on pipe material type and diameter are provided. The information presented in this case study is based on the utility information, and additional documents and presentations provided by Seattle Public Utilities.
